chrome enterprise

IT Set Free with
Chromebook Enterprise

Chromebook Enterprise combines the end user benefits of Chrome OS with the business capabilities of Chrome Enterprise Upgrade for IT to power the cloud workforce to work securely and effectively from anywhere.

Fast Deployment and Simple Management
Managed Chrome OS devices see a 76% time savings during deployment compared to Windows devices[1]. I.T. gains access to 500+ device policies, fleet oversight capabilities, and managed updates, all from the cloud-based Google Admin console or third party UEM solution.

Apps for Every Worker
Chrome OS gives access to your employees' favorite productivity suites and video conferencing apps. Download and run Android apps from the Google Play Store, and access Windows apps through VDI or Parallels Desktop. Look for the Chrome Enterprise Recommended badge for verified apps optimized for Chrome OS.

Modern Employee Experience
Experience high-performance devices that boot up fast and don't slow down over time. Quickly log in to any device and pick up where you left off with cloud profiles. Updates install in the background, and you can work from anywhere, on any Chrome OS device.

Built-in, Proactive Security
Chrome Enterprise Upgrade provides I.T. with advanced security controls. If an end user misplaces their Chromebook, I.T. can easily disable the device, protecting corporate data. Devices can also be set as ephemeral, removing user data from the device at the end of a session.

A Smart and Eco-Friendly Investment
Switch to Chromebooks and see $482 in savings per device per year from reduced deployment, upgrade, and training costs. Chromebooks use up to 46% less energy[2] to lower your device carbon footprint and are made with sustainable and recyclable materials.
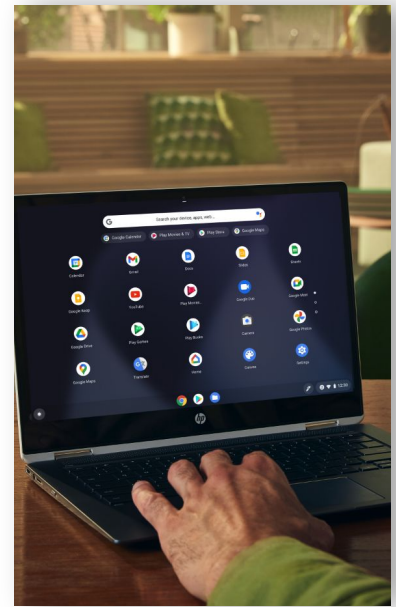

"
Chrome Enterprise provides the rugged hardware and reliable OS needed in high-pressure emergency situations, along with easy management tools."

Michael Romatzick,
Desktop Architect,
Middlesex Health
