Chess Variant Kits

US Chess Sales is excited to offer a new line of Chess Variant Kits. The additional pieces introduced by these kits allow the players to enhance the tactics from the very first move and provide the capacity to form new strategic ideas. The game itself becomes more enriching, allowing for more creativity and less theories into opening plays. This new combination guarantees more matches played and drastically reduces the number of games ending in a draw. Thus, the game becomes more spectacular and fun. The basic fundamentals and previous insights of chess are respected, but the new pieces add new strategic elements, especially concerning the roles of the pawns.

Note - All Chess Variant Kits require a set of chess pieces and a traditional 8x8 chess board, which must be purchased separately.
